# Volodymyr Kuchirka

## Junior QA Engineer

I set a goal to become a Quality Engineer, and now I am a junior QA. I pay particular attention to details, and I am a passionate and eager for knowledge and experience job seeker. I have excellent knowledge of software development life cycle (SDLC) and agile methodologies, and familiar with writing Use Cases, Test Cases and Checklists, using TestRail as well as executing Tests, finding bugs and preparing bug reports, working with Jira. With good communication skills, I can work successfully in a friendly and productive team environment. I am organized, and hardworking and want to make full use of my knowledge in a dream position.

## PROJECTS

### Testing of Pryvat24Online Banking App and Slack App.

- Regression testing, creating Test Cases for usability, and performance.
- Creating checklists for Slack App sanity testing.

### HTTP requests in DevTools of Makeup.

- Using Chrome DevTools Analysis of the request, its method and status.
