Volodymyr Kuchirka

Junior QA Engineer

More recently, I set a goal to become a Quality Engineer, and now I am a junior QA. I pay particular attention to details, and I am a passionate and eager for knowledge and experience job seeker. I have excellent knowledge of software development life cycle (SDLC) and agile methodologies, and familiar with writing Use Cases, Test Cases and Checklists, using TestRail as well as executing Tests, finding bugs and preparing bug reports, working with Jira With good communication skills, I work successfully in a friendly and productive team environment. I am organized, and hardworking and want to make full use of my knowledge in a dream position.
